## Preface

The following conventions are used in this document:

<b>Bold</b>	Used for information that is typed, pressed, or selected in executables and instruction. For example, select <b>connect to host</b> .
<i>Italics</i>	Used for file names, directories, scripts, commands, user IDs, document names, and Bibliography references; and any unusual computerese the first time it is used in text.
<u>Underline</u>	Used for emphasis.
Arrows <>	Used to identify keys on the keyboard. For example <RETURN>.
“Quotation Marks”	Used to identify informal, computer-generated queries and reports, or coined names; and to clarify a term when it appears for the first time.
Courier Font	Used to denote anything as it appears on the screen or command lines. For example <code>User:/ora01/dba/oradb:/bin/csh.</code>
Capitalization	Used to identify keys, screen icons, screen buttons, field, and menu names.

---

## **Installation Procedures**

This document provides a quick reference for installing the ORACLE Client Tools 2 Segment onto a Hewlett Packard Defense Information Infrastructure (DII) Workstation.

---

## INSTALL PROCEDURE: ORACLE Client Tools 2 (ORAT2)

This document contains the installation instructions for the ORACLE Client Tools 2 Segment (ORAT2). This segment requires the ORACLE Client (ORAC) Segment. The installation requires no user interaction after installing the segment via the COE installer. ORACLE Client Tools 2 has no icon associated with it and upon installation will be used with certain applications. For use of the COE Installer, reference the DII System's Administrator's Guide. For actual use of Oracle Client Tools 2, reference the ORACLE Client Utilities System Administrator's Manual.

### KNOW THIS BEFORE INSTALLATION

The following describes the space required to install the Oracle Segments on a machine. It is not recommended to put the application software on the same machine as the database, this information is broken out to be able to put all on a single machine or on separate machines.

	/ora01	/ora02	/ora03
ORAS	300M		
DIIDB	75M	1M	1M
<hr/>			
D-base Total	375M	1M	1M
ORAC	57M		
ORAT2	256M		
ORAU1	7M		
<hr/>			
App. Total	320M		
Grand. Total	695M		

---

These values allow room for log and trace files that are generated and some room for growth. The totals do not apply to other databases that might be delivered. Further, if additional ORACLE products are delivered, this total could grow.
